ALMAC 427SC Hardtop

NOW YOU CAN USE YOUR CAR ALL YEAR ROUND

**DIRECT
From the
FACTORY**

After many years and thanks to customer demand Almac Cars have developed and produced a hardtop to fit their 427SC Cobra replica.

Made from GRP it has an outer and inner skin with solid glass rear windows. The top has been designed to sit on a soft rubber seal across the rear of the car with another rubber seal to ensure a tight fit across the windscreen.

It is held in position with two over centre clips which attaches the top to the windscreen pillars and two brackets which hook under the cockpit lip just behind the rear door. No holes are drilled in the body.

The roof has been designed to fit over the standard roll bar hoops and does not interfere with the function of the boot lid.

The only modification that may be required is the resetting the angle of the windscreen and adding or relocating the high stop light.

Exterior gel coat finish is black or white.

Side windows are made of unbreakable polycarbonate. These are hinged off the windscreen pillars with stainless steel hinges and can easily be removed.

Price Ex-Factory

HARDTOP	\$3,600
G.S.T.	\$540
Total	\$4,140
WINDOWS	\$720
G.S.T.	\$108
Total	\$828
