

**Take a  
dream**

**Make it  
a reality**

*The Sabre features sensational styling and individuality.*

*Designed with the precision and care that has made ALMAC a byword in the kit car industry, the Sabre combines a beautiful shape with affordable mechanical parts.*

*The standard 2 litre Cortina version gets you a great set of wheels at a price that's economical to build and maintain or you can go for the optimum power and performance with V6 or Rover V8 engines.*

*The choice is yours.*

- Headlight Covers*
- Perspex Headlight Covers*
- Spotlight Holders*
- Demister Ducts*
- Bonnet Catch Bracket*
- Boot Catch Pin*
- Steering Column Bracket*
- Badges*
- Build Manual*

<b>CHASSIS</b>	<b>BODY</b>
<p>The chassis is constructed from rectangular steel tubing and designed with the aid of a CAD system to provide a high degree of torsional rigidity and strength. The chassis is hand built in specially constructed jigs to ensure its accuracy. All brackets are fitted and holes pre-drilled. The chassis extends the length and width of the car giving front, rear and side impact protection.</p>	<p>The fibreglass body is complete with floors and bulkheads, bonded in to give a rigid unit which fits directly to the chassis. Steel frames are bonded in, one across the front scuttle to mount the doors and steering column and the other across the rear of the cockpit to fit the door latches and seat belt mounts. All holes over 10mm are drilled and edges trimmed.</p>

The Sabre is built from a high quality kit comprising a very tough fibreglass body which is assembled on an extremely strong long lasting chassis. Anyone with a degree of practical ability, some common sense and a certain amount of patience, can build a Sabre. No specific engineering or mechanical skills are required.

Comprehensive building instructions are supplied with

each kit. These can be purchased for \$27 refundable on purchase of kit. By using the Ford Cortina Mk4 or 5 as a donor car, cost is kept to a minimum.

The kit is designed so that almost every part is available from the donor car, the only extras required are the trim, Corolla doors for windows, locks, etc., soft top and painting. Also if required, a different engine and gearbox.

#### DIMENSIONS

<i>Length</i>	3980mm
<i>Width</i>	1700mm
<i>Height</i>	1200mm
<i>Wheelbase</i>	2305mm
